Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

1. This communication is response to Applicant's amendment filed on July 16, 2003. The rejections are as stated below:

Status of Claims

2. Of the original claims, claims 1-19 and 21-26 have been canceled. Therefore, claim 20 is under prosecution in this application.

Summary of this Office Action

3. Applicant's arguments filed on July 16, 2003 have been fully considered, and discussed in the next section below or within the following rejection are not deemed to be persuasive. Therefore, claim 20 rejected as being unpatentable over the art cited below, and Applicant's request for allowance is respectfully denied. Please note that the Applicant's amendment to claim priority in the specification has been accepted and entered into the record.

Response to Amendment

4. Applicant has amended claim 20 to include elements derived essentially from base independent claim 1 and intervening dependent claims 13, 17, 18 and 19. Please see below for objection and rejection made regarding claim 20.

Claim Rejections - 35 USC §101

5. Claim 20 is rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

The basis of this rejection is set forth in a two-prong test of:

- (1) whether the invention is within the technological arts; and
- (2) whether the invention produces a useful, concrete, and tangible result.

For a claimed invention to be statutory, the claimed invention must be within the technological arts. Mere ideas in the abstract (i.e., abstract idea, law of nature, natural phenomena) that do not apply, involve, use, or advance the technological arts fail to promote the "progress of science and the useful arts" (i.e., the physical sciences as opposed to social sciences, for example) and therefore are found to be non-statutory subject matter. For a process claim to pass muster, the recited process must somehow apply, involve, use, or advance the technological arts.

In the present case, claim 20 only recites an abstract idea. The recited steps of merely obtaining information about a customer and an insurance policy and performing a mathematical analysis to determine the optimal investment recommendation does not apply, involve, use, or advance the technological arts since all of the recited steps can be performed in the mind of the user or by use of a pencil and paper. These steps only constitute an idea of how to select an insurance policy over another.

Additionally, for a claimed invention to be statutory, the claimed invention must produce a useful, concrete, and tangible result. In the present case, the claimed invention produces scores

for various policies (i.e., repeatable) used in determining and selecting the best insurance policy (i.e., useful and tangible).

Although the recited process produces a useful, concrete, and tangible result, since the claimed invention, as a whole, is not within the technological arts as explained above, claim 20 is deemed to be directed to non-statutory subject matter.

Example:

A ***computerized*** method for selecting an insurance policy comprising the steps of:
(a) retrieving information from a customer and an insurance policy;
(b) scoring the insurance policy based upon the information from the customer and policy; and
(c) iterating steps (1) and (2) with different policies until a best insurance policy is selected based on a score determined from step (b).

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claim 20 is rejected under 35 U.S.C. 102(e) as being anticipated by Jones et al. (United States Patent Number 6,021,397).

Claim 20 describes a method comprising of receiving taxable and non-taxable investment, investor information (fig. 4; col. 5, lines 52-63), performing an optimization and providing a recommendation (figs. 3-8; col. 8, lines 36-33; col. 10, lines 18-28).

The method also describes a non-linear optimization routine. Jones et al. disclose an "econometric module" where non-linear optimization routine is used (figs. 5-6; col. 8, lines 14-26). Future projected returns are performed by different modules through several subroutines (col. 2, lines 48-64; col. 7, lines 66-67; col. 8, lines 1-5)

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 3624

however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
